VOTE OF THANKS

Special appreciation goes to IRISHAID Staff for your support towards AIDS Information Centre’s participation in the 2015 World AIDS Day Commemorations.

In a special way, I would like to concede Older People for the time and energy invested in ensuring that issues and concerns related to HIV & AIDS are sounded during this year’s World AIDS Day.

Allow me to recognise our partners we closely worked with during this year’s World AIDS Day; HelpAge International, Sight Savers International, Uganda Reach the aged Association for the support and resources contributed towards this event.

I want also to appreciate the government of Uganda especially Kiboga District Local Government, Expanding Social Protection Programme Secretariat (ESPP) and the SAGE Office in Kiboga District for the corporation and support invested in the event.

I want also to thank my Health Team at AIC for the support provided right from planning to service delivery during the day.

Let us join hands, strengthen our partnerships and collaborations for the attainment of a Uganda Fit for Senior Citizens.

Executive Director
AIDS Information Centre-Uganda
OUR APPEAL TO IRISHAID

To the Ambassador of Ireland,

AIDS Information Centre Uganda is aware that IRISHAID is a cardinal donor of ESP in Uganda.

We are aware that the GoU is advancing in providing support to older people (OP) for example Celebrating International Day for Older People (IDOP) on 1st October every year, Establishment of a Disability and Elderly Department, Passing of the National Policy for OP and its Action Plan). However, these achievements are not completely owned by the GoU yet OPs are a sensitive group that needs health care services. OPs are discriminated in the healthcare system of Uganda and are not recognized in most of the national health related strategies, programmes, policy and frameworks. OPs are rejected and no need for healthcare service extension to them. They are discriminated on the basis of their low input in social-economic activities.

We are also aware that in terms of health, Uganda continues to bear a huge burden of HIV&AIDS with an estimated 1.6 million people living with the disease and 176,948 being children (MOH, 2014) and most of such children are usually orphaned and left in the care of older people. The HIV&AIDS pandemic poses a challenge to the Ugandan society and has had a devastating impact on older persons.

We are also aware that 93% of Older People are sexually active, 87% are caretakers of HIV&AIDS patients and 10% are sexually assaulted. Most of them lose economic support when their children die and have to go through the stress of caring for orphans. Lack of family support or approval of older persons to marry leads them to secret sexual engagement, which exposes them to HIV&AIDS infection. Most of the traditional healers and traditional birth attendants (TBAs) are older women and men. They are not targeted for support in terms of access to information on HIV&AIDS. As a result they are at a risk of contracting HIV&AIDS. The female elderly also mentioned the increasing burden of orphans due to HIV&AIDS as a major contributor to their chronic state of poverty.

With the above background, we therefore urge IRISHAID to continue and expand the partnership with AIDS Information Centre Uganda to replicate this best practice in ESP targeted districts.

Yours Sincerely,

Executive Director
AIDS Information Centre Uganda
EXECUTIVE SUMMARY

AIDS Information Centre was selected to partner with IrishAid in organizing an HIV&AIDS Community Outreach programme in relation to Social Protection Programme in Kiboga district and is proud to report that a number of achievements were recorded during the implementation of this project:

I. Objectives and program Achievements

Objective 1: To educate the target population about social protection. AIC used various methods to mobilize individuals for services including door-to-door peer mobilization using the existing district and SAGE community structures mainly the VHTs and Peer mentors where 2500 individuals were reached. During the mobilization exercise educational talks on the ESP Programme and service to be provided on the world AIDS day were disseminated.

Objective 2: To create a knowledge sharing platform about good health and social protection within the communities. Four districts based project entry and planning meetings involving district authorities were successfully held to introduce the new service delivery concept to district leadership. The objective of the meeting was to define roles of key players and solicit for support from district administration in the implementation process. Key district heads of departments and political leaders that participated included: Chairperson Local Council V, Chief Administrative Officer, District Health Officer, District Planner, District Engineer, DCDO and the hosting subcounty officials including the health in charge, sub county chief, sub county LC3 chairperson. During the meeting the district leadership expressed gratitude towards support from IrishAID and pledged to support the project. The Irish Ambassador to Uganda visited 5 ESPP programme beneficiary homes to interact and discuss impact of the SP fund. During the visits beneficiaries were recognized for their contribution in providing services to orphan and the elderly. During the visits information about healthy living, good hygiene and how to maintain sanitation at individual and household level was provided to the communities.

Objective 3: To raise awareness of HIV&AIDS and other related diseases amongst the target populations in Kiboga district

During the World AIDS day commemoration, AIC invited 1 local drama group which composed songs and role plays on HIV&AIDS and the importance of Social Protection.

487 IEC materials of different categories with messages that encourage people to seek for treatment and care or look after those living with HIV&AIDS, cancer, Diabetes, TB among others were distributed to the communities by the AIC team and peers mentors mobilized from the district.

Objective 4: Promote HIV integrated services and other health related early diagnosis among Older People and other community members

A total of 197 were counseled for HIV, of which 190 (86F/104 M) people were tested and received results out of the planned target of 450 making a percentage achievement of 42%. Of these 45% were females and 55% were males. 4 (3F/1M) clients (2.1%) tested HIV positive. All HIV positive clients were effectively referred for on-going care and support to the nearest health facilities especially public units.

44 Women were screened for cancer of the cervix of which 9 had a VIA positive and was referred to the Kiboga health facility for further management.
Theme: “Social Protection Better Health for Senior Citizens”

9,000 male condoms were distributed. Condom education and distribution was done on an individual basis. Most of the condoms were taken by the younger population which tested. Lessons learnt
A total of 54 individuals were screen for STI and 14 treated for STI, 14 individuals received FP services.

347 individuals (99 male and 248 female) had their Blood pressure measuring. 5 clients were circumcised.

AIC worked with Sight Savers to diagnose eye diseases among Older People. Free EYE care services such as spectacles and free walk-in outreach medical services for beneficiaries were provide. A total of 168 individuals were offered Optical services by Sight Saver of which 17 Clients had Cataracts, 26 had Refracted, 11 provided with glasses and 14 treated for other illnesses.

Prior to the event, 5 district preparatory and planning meetings were held by the District Organizing Committee. 1 Shade and 1 toilet was constructed

Figure 1: AIC Counselor Recording OP’s Health Bio-data

2. Partners Worked with

Main partners included
- Kiboga District Local Government,
- ESP Secretariat,
- SAGE Office Kiboga,
- HelpAge International,
- Sight Savers International
- Uganda Reach the Aged Association.
1.0 BACKGROUND

AIDS Information Centre-Uganda (AIC) is a Non-Governmental Organization with an experience of over 25 years in Health service delivery with regional offices situated in Arua, Mbarara, Kampala, Lira, Kabale, Jinja, Mbale and Soroti covering 52 districts of Uganda. AIC has been working with various organizations offering the following are services to the communities;

- Integrated HIV/SRH services;
- HIV counseling and testing;
- Safe circumcision,
- family planning,
- STI screening and management,
- condom programming,
- HIV /SRH Health education, development and distribution of IEC materials and
- Capacity building of health workers in HIV/SRH services.
- Screening and management of communicable and non communicable diseases
- Laboratory services
- Gender mainstreaming in all our activities

AIDS Information Centre-Central Region in partnership with IrishAid organized an HIV&AIDS Community Outreach programme in relation to Social Protection Programme. The event took place on 10th December 2015 in Kibiga Sub-county in Kiboga District. The Theme of the event was “Social Protection, Better Health for Older Persons”.

2.0 OBJECTIVES OF THE PROJECT

The purpose of the project was to contribute to improved knowledge about HIV&AIDS among IrishAid Staff and demonstrate to both Irish Aid and Social Protection Actors on how ESSP provides entry point for HIV&AIDS prevention.

The project also aimed at educating the target population about social protection. Raising awareness of HIV&AIDS and other related diseases amongst the target populations in Kiboga District. Promoting HIV integrated services and carry out early diagnosis of chronic diseases among Older People, community members, and make appropriate and timely referrals.

Specific objectives of the partnership were:

- To increase staff learning on social protection and HIV&AIDS prevention.
- To create a knowledge sharing platform about the links between SP and good health and HIV&AIDS prevention within the communities.
- To reach out to SAGE beneficiaries and surrounding communities in Kiboga with health, HIV&AIDS and prevention and response services.
3.0 METHODOLOGY

- District Stakeholders’ Planning Meetings
- Community door-to-door mobilization of Ops through Ops’ existing structures in one place
- Provision of Cash Transfers to Senior Citizens
- Partnership coordination meetings were held with SSI, HelpAge and URAA
- Debriefing AIC staff about service provision and other related issues to Older People.
- Delivery of Health Talks on D-Day.
- Partnership with existing District Health Teams.
- HIV Counseling and testing as the entry point for all services.
- Integration of IEC/BCC Messaging in HCT.
- Provision of HIV&AIDS and SRH services
- Music, Dance and Drama
- Material development with BCC Messages
- Infrastructural development for Older People
- Distribution of hampers to Older People by IA

Figure 2: Team Delivering Hampers to Older People
4.0 IMPLEMENTED ACTIVITIES

The planned activities included: HIV counseling and testing, Random blood sugar test, Hepatitis B test, cervical cancer screening, Family planning, Health education, STI management and treatment of minor illnesses, Referral; linking the old and other people to where they can access further medical services. Exhibition of AIC services, Optical services, Safe male circumcisions and Condom Programming

**Conduct door-to-door peer mobilization:** 15 Peer Mentors were recruited to undertake community mobilization using door-to-door sensitization and invitation to the D-Day. Irish Aid, AIC, Sight Savers, HelpAge, URRA, ESP staff, Local Leaders and CDOs were involved in mobilization event.

**District Stakeholders Meeting:** Over 20 key stakeholders were invited to the meeting. The meeting worked as a briefing to IA staff, district officials and AIC staff.

**Deliver Education Talks on Overview of ESP Programme and HIV&AIDS:** Irish Aid staff on D-Day were engaged using a public address system to educate older people, other community members and IA staff on the successes, lessons learned, challenges and best practices for replication. During the day, AIC and other partners encouraged community members to support Older People and other vulnerable groups in their daily lives.

**Conduct District Organizing Committee Meetings (DOC):** Prior to the D-Day, a DOC was formed which involved IrishAid staff, AIDS Information Centre staff, HelpAge International staff, Uganda Reach the Aged Association staff, Sight Savers staff and ESP Focal Person, The DCDO, CAO, HIV focal person. Four DOC meetings were organized to plan better for the D-Day Event.

**Visit ESPP programme beneficiary homes to interact and discuss on the impact of their program but also to prepare for the WAD event:** Irish Aid staff and other partners visited communities of older people and identified 4 beneficiaries’ homes for learning (two homes were visited by the Ambassador and two by his team). These home visits were mainly for learning, documenting good practices and writing significant stories of changes of older people benefiting from SAGE. During these visits, AIC provided information about healthy living, good hygiene and how to maintain sanitation at individual and household level. The visits were also used as a community
mobilization avenue for the WAD event. On the event itself, the Guest of Honour (the Ambassador) and his team visited a few homes of senior citizens benefiting from SAGE for learning.

Conduct music, dance and drama with educational messages to enable the target groups to understand risk sexual behaviour: An existing drama group of older people and people living with HIV was identified, invited and facilitated to compose skits, songs and role plays on HIV&AIDS and the importance of HIV&AIDS prevention integrating it with social protection. AIC took charge in sharing and giving a comprehensive health care Education and information about HIV and other optimistic infections. Identification of the group was successful with the support of DCDO. The group was able to exhibit HIV&AIDS messages through skits and MDD and these were in local language best known by the population.
Disseminate Information, Education and Communication/Behavioural Change Communication materials. During the event, 1000 brochures, 1000 posters and 1000 leaflets) on behavioural or lifestyle change, care and support for the infected and affected older people were distributed. AIC distributed positive messages that encouraged older people and other community members to seek for treatment and care or look after those living with HIV&AIDS, cancer, Diabetes, TB among others. To enhance information circulation, our tents were branded with information and walls were painted innovatively to provide education and information on HIV&AIDS prevention and other diseases.

Conduct HIV Integrated Services: Older people and those under their care accessed health care services. AIC used a holistic approach to treatment of HIV&AIDS related infections such as syphilis, gonorrhea, genital warts, TB, TB/MDR and Malaria. Different tents were staged for these services. In addition, AIC also conducted nutritional counseling. Our health team also provided cancer cervical screening for older women, women and girls under the care of older people. We also examined high blood pressure for older people. Other services provided were Safe Male Circumcision for older men and boys under their care, Sexually Transmitted Infection Screening for older people, young people and adults. AIC recorded and gave test results in a few minutes with confidentiality to the clients. AIC also encouraged couple or partner counseling and testing. We conducted onsite diagnosis and distributed ARVs. Free walk-in outreach medical services for beneficiaries was encouraged. An Ambulance was also stand-by to provide first aid to older people. We also assisted older people living with HIV to access care, counseling and treatment by making referrals. Health education was provided to the older persons and those under their care.
A total of 197 were counseled for HIV, of which 190 (86F/104 M) people were tested and received results out of the planned target of 450 making a percentage achievement of 42%. Of these 45% were females and 55% were males. 4 (3F/1M) clients (2.1%) tested HIV positive. All HIV positive clients were effectively referred for on-going care and support to the nearest health facilities especially public units.

44 Women were screened for cancer of the cervix of which 9 had a VIA positive and was referred to the Kiboga health facility for further management.

9,000 male condoms were distributed. Condom education and distribution was done on an individual basis. Most of the condoms were taken by the younger population which tested. Lessons learnt
A total of 54 individuals were screen for STI and 14 treated for STI, 14 individuals received FP services.

347 individuals (99 male and 248 female) had their Blood pressure measuring. 5 clients were circumcised.

Prior to the event, 5 district preparatory and planning meetings were held by the District Organizing Committee. 1 Shade and 1 toilet was constructed

**EYE Examination and treatment:** AIC worked with Sight Savers International to diagnose eye diseases among Older People. Free EYE care services were provided to older people. Sight Savers also contributed funds in terms of allowances, perdiems and communication for Ophthalmic Clinical Officers and others. A total of 168 individuals were offered Optical services by Sight Saver of which 17 Clients had Cataracts, 26 had Refracted, 11 provided with glasses and 114 treated for other illnesses.

**Construction of two permanent structures:** It was evident that older people used to wait for their cash at the sub-county of Kibiga in the sunshine, rain and other unfavorable conditions and there was an indicator of poor hygiene for them. To address this, IrishAid supported AIC to build a permanent Shade that accommodates over 1,000 people and Toilet that also accommodates 10 people per usage to bridge the gap for older people to enjoy picking their cash. We are also aware that IrishAid is one of the chief donors of SAGE, therefore, this best practice and a commitment made in Kibiga Sub-county in Kiboga District challenges all other donors including UNICEF and UKAID to replicate the same in the next round of funding SAGE in targeted districts. AIDS will monitor and evaluate significant changes/value addition created by these structures to the lives of older people.

**Theme:** “Social Protection Better Health for Senior Citizens”
7.0 LESSONS LEARNT

- Integration of health services to older people increases accessibility and utilization of services.
- OPs prefer accessing services in one place and on a specific day due to mobility challenges.
- Majority of Older people do not have multiple partners but other factors have been identified that predispose them to HIV infections like being primary caregivers of OVC and PLWHA.
- Many of them were first time testers for HIV.
- There is need to for more awareness creation and education for older people to guard against issues of stigma and discrimination which makes them hesitate to test.
- Older people embraced the services and we urge IA to continue funding this.
- There are multiple health challenges with older people which require routine health service delivery to them.
- This activity served as a fellowship where the older people interacted freely and accessed services in a more relaxed environment.
- There is need to decentralize service delivery to enable older people and their households to access services.
- Older people accessed services on individually no as couples yet more sensitization required.
8.0 CHALLENGES

- Limited time for health education and service provision
- The overwhelming numbers of clients services vis-à-vis the number of drugs given.
- Community preparation period for older women was not adequately provided to enable them prepare for cervical cancer screening, thus more sensitization still needed.
- Limited cryo-therapy to treat suspected cases.

9.0 RECOMMENDATIONS

**Recommendation 1:** There is need for regular wellness programs; AIC recommends for continuity of these kind of outreaches on a regular basis and AIC is ready to partner with IA and other partners such as District Local Governments, HelpAge, URAA and Sight Savers International for service delivery.

**Recommendation 2:** There is need to get a crayon-therapy machine to ease treatment.

**Recommendation 3:** Older people need more time and many had other psychosocial and more complicated issues which they thought would be solved there and then. For example acquiring spectacles and reading glasses, tooth extraction and teeth refilling among others.

**Recommendation 4:** Older men are skeptical about embracing circumcision. We need to sensitize them more about benefits of circumcision. Many were saying it is for the young population and they fear to tamper with their sexual organs at their age.

**Recommendation 5:** Older people get tired and fed up very quickly, so they need to be occupied by giving them health talks during the time they are waiting for cash transfer services.

**Recommendation 6:** Older people need regular sensitizations about their health issues for example cancer screening in women and safe male circumcision.

**Recommendation 7:** Management of Non-Communicable Diseases is the main health issue for older people (ailments such as Hypertension, Arthritis, Diabetes and Back pain).

**Recommendation 8:** IrishAID should continue to support AIDS Information Centre to continue providing healthcare services to older people in ESP targeted districts.

**Recommendation 9:** As a best practice, other donors of ESP should also join hands in supporting Shade and Toilet Construction at Cash Transfer Pay Points.

**Recommendation 10:** Keep track of the added value of the two structures and conduct a comparison assessment in the ESP targeted districts and the Non-ESP districts.

STORIES OF CHANGE: HOME VISITS TO SAGE BENEFICIARIES

Story 1: Theopista Nakyanzi (70)

Theopista Nakyanzi is a Senior Citizen and a beneficiary of SAGE and a resident of Kibiga she was visited by the IRISH Embassy staff. Nakyanzi looks after her two daughters and a grandchild. With her money from SAGE, she bought a goat and pig at UGSHS 40,000, it has been able to produce twice, she sells off the make pigs at UGSHS 250,000. Nakyanzi uses the income generate from the piglet sales to look after her family. She has ably provided scholastic materials for the grandchild. She even transports herself to the health facilities for health care services when she falls sick. Nakyanzi also reported that the savings and cash transfers being received will be used to renovate her house since the husband died and the house is in a poor state.

Story 2: Mariah Nalubega (72)

Mariah Nalubega is a resident of Kibanga and also a SAGE beneficiary she was also visited by the Irish Aid staff and given some necessities and two goats. With her money that she receives from SAGE, she has used it to look after her grand children. Mariah also urged other beneficiaries to use their money wisely. She also has plans of building a new house out of the savings she makes.
